Presented to
The Library
of the
University of Toronto
by
Dr. R. D. Rudolf
Gowans's Nature Books

THE object of these little books is to stimulate a love for nature and a desire to study it. All the volumes of the series that have been issued so far have been very successful, and the publishers hope to be able to maintain the very high standard of excellence which has made this series so well known all over the country. Some of the photographs included in the different volumes are unequalled and unique triumphs of the nature-photographer's art.

No. 1.—WILD BIRDS AT HOME. Sixty Photographs from Life, by Chas. Kirk, of British Birds and their Nests.

No. 2.—WILD FLOWERS AT HOME. First Series. Sixty Photographs from Nature, by Cameron Todd.

No. 3.—WILD FLOWERS AT HOME. Second Series. By the Same.

No. 4.—BUTTERFLIES AND MOTHS AT HOME. Sixty Photographs from Life, by A. Forrester.

No. 5.—WILD BIRDS AT HOME. Second Series. By Chas. Kirk.

No. 6.—FRESHWATER FISHES. Sixty Photographs from Life, by Walford B. Johnson and Stanley C. Johnson, M.A.

No. 7.—TOADSTOOLS AT HOME. Sixty Photographs of Fungi, by Somerville Hastings, F.R.C.S.

No. 8.—OUR TREES & HOW TO KNOW THEM. Sixty Photographs by Chas. Kirk.
No. 9.—WILD FLOWERS AT HOME. Third Series. By Somerville Hastings, F.R.C.S.

No. 10.—LIFE IN THE ANTARCTIC. Sixty Photographs from Life by Members of the Scottish National Antarctic Expedition.

No. 11.—REPTILE LIFE. Sixty Photographs from Life, by Walford B. Johnson and Stanley C. Johnson, M.A.

No. 12.—SEA-SHORE LIFE. Sixty Photographs by the Same.

No. 13.—BIRDS AT THE ZOO. Sixty Photographs from Life, by W. S. Berridge, F.Z.S.

No. 14.—ANIMALS AT THE ZOO. Sixty Photographs by the Same.

No. 15.—SOME MOTHS AND BUTTERFLIES AND THEIR EGGS. Sixty Photographs by A. E. Tonge, F.E.S.

No. 16.—WILD FLOWERS AT HOME. Fourth Series. By Somerville Hastings.

No. 18.—POND AND STREAM LIFE. Sixty Photographs from Life, by Walford B. Johnson and Stanley C. Johnson, M.A.

No. 19.—WILD BIRDS AT HOME. Third Series. By Chas. Kirk.

No. 20.—ALPINE PLANTS AT HOME. First Series. Sixty Photographs by Somerville Hastings, F.R.C.S.

Others in Preparation.

PRICE 6d. NET. EACH VOLUME; POSTAGE 1d. EACH.

GOWANS & GRAY, Ltd., London & Glasgow

BARBOUR'S
BRUCE
THE METRICAL HISTORY OF
Robert the Bruce
King of Scots

COMPiled A.D. 1375 BY
John Barbour (Archdeacon of Aberdeen.)

Translated By
George Eyre-Todd.
Author of "Scotland, Picturesque and Traditional."

By reason of the archaic language in which it is written, Barbour's famous story of The Bruce has long been a sealed book to all but expert students of ancient literature. It has now been translated for the first time in the hope that it may resume the popularity to which it is entitled by the splendid merits of its heroic tale.

Gowans & Gray, Ltd., London and Glasgow.
Second Edition. Revised and Enlarged

SCOTLAND

PICTURESQUE

AND

TRADITIONAL

BY GEORGE EYRE-TODD

With 56 Illustrations from recent Photographs

A most interesting and delightful account of the history and legends connected with the most romantic spots in Scotland. Every page recalls memories and traditions that have a lasting place in every true Scotsman's heart

Leather back, tartan sides, g.c., 5/ net. Do. do.

GOWANS & GRAY, Ltd., LONDON & GLASGOW
THE ART OF
MISS JESSIE M. KING

The work of this talented young artist is now well-known in this country and on the Continent because of its striking originality and the graceful beauty of its design.

Her pen-work is shown at its best in a little book of drawings of trees and shrubs, called

BUDDING LIFE

which is published at Sixpence net (post free 7d.), and in an edition de luxe at One Shilling net (post free 1/1).

Her colour-work is also shown to great advantage in a charming colour-print called

APPLE BLOSSOM

which is sold in a pretty paper frame, ready to hang up, at One Shilling net (post free 1/4). Its fine taste makes it an ornament to any room, no matter how luxuriously furnished.

The following Sixpenny net books (post free 7d. each) have delightfully decorative parchment covers also designed by Miss King:

OUR TREES AND HOW TO KNOW THEM
THE MARRIAGE RING. Jeremy Taylor.
EVERYMAN. A Morality Play.
GOBLIN MARKET AND OTHER POEMS
Miss Rossetti.
ALLADINE AND PALOMIDES. Maeterlinck.
THE MASQUE OF THE TWO STRANGERS.
Lady Alix Egerton.

All the above are published by Messrs. Gowans & Gray, Ltd., 5 Robert Street, Adelphi, London, W.C., and can be had of any bookseller.
WILD BIRDS AT HOME

(THIRD SERIES)

By CHARLES KIRK

Messrs. Gowans & Gray have much pleasure in announcing that on 1st December, 1907, they will publish a third series of WILD BIRDS AT HOME. A new series has been much asked for and will, they think, be received with delight by possessors of the two earlier volumes. Mr. Kirk has been fortunate in securing some splendid negatives during the summer, including photographs of the dipper, cormorant, eiderduck, ringed plover, snipe, etc., etc. In fact the publishers believe this series is equal to the first, which is saying a great deal.

Gowans & Gray, Ltd.,
London and Glasgow
The Children's Bookshelf

PRETTY little Books with about a dozen
coloured illustrations by well-known artists.

No. 1.—THE UGLY DUCKLING, by Hans Andersen.
Coloured illustrations by Stewart Orr.

No. 2.—LITTLE KLAUS AND BIG KLAUS, by Hans Andersen. Coloured illustrations by Charles Pears.

No. 3.—THE PIED PIPER OF HAMELIN, by Robert Browning. Coloured illustrations by Charles Robinson.

No. 4.—THE STORY OF CHANTICLEER. Re-told from Chaucer, by R. Brimley Johnson. Coloured illustrations by Stewart Orr.

Price, 60. Each in Parchment Covers. Post Free 7d.

GOWANS & GRAY, Ltd., London & Glasgow
Drawings . . .
from the . . . . . . . .
Old Masters.

These artistically got up little books are uniform in size with Gowans's Art Books, and will be found of absorbing interest by every student of Art.

First Series.—Containing sixty reproductions of Drawings by famous Artists in the Albertina Gallery, Vienna.

Third Series.—Containing sixty reproductions of Drawings by Dutch and Flemish Masters in the State Museum, Amsterdam.

Postage, 1d. Each.

Holland: Kirberger & Kesper and Jacs. G. Robbers, Amsterdam.

"" A. Abrahams, The Hague.

Reprinted, January, 1907, May, 1907
(completing 20,000).
IN none of the volumes of the present series are the marvellous processes of nature more forcibly brought home to the reader than in the sixty photographs in this little volume. The patience and observation of Mr. Forrester have borne fruit in a series of pictures of the life-histories of some Butterflies and Moths, and of examples of protective resemblance which will surely fill every thinking mind with wonder and reverence. The nomenclature followed is that of Kappel and Kirby's "British and European Butterflies and Moths," 1896.
The young caterpillar sleeps through the winter in a hammock which it constructs from a small leaf. To prevent this leaf falling to the ground with its fellows, the larva attaches it securely to the stem of the plant with many fine silken threads.
The honeysuckle buds having now expanded the caterpillar leaves its winter residence. It feeds, however, principally at night, passing the day on the stem as here shewn.
THE LIFE-HISTORY OF A WHITE ADMIRAL BUTTERFLY. Plate 3

*Limenitis sibylla*

June 10th

It has now attained its full growth—
—and spinning a small silken pad on the underside of a leaf, suspends itself therefrom by its hindmost pair of claspers or pro-legs.
It now casts off its larval jacket and appears as a pupa or chrysalis—
—and one bright morning the perfect insect emerges, and hangs from its empty pupa case until its wings are fully grown, and sufficiently stiff for flight.
The Life-History of a Brimstone Butterfly (Gonepteryx rhamni). Plate 1

June 10th

A half-grown larva of the Brimstone Butterfly or Buckthorn. It feeds at night, and during the day takes up the position shewn, when it is very difficult to see.
The Life-History of a Brimstone Butterfly. Plate 2
(Gonepteryx rhamni)

A large spider which lives among the leaves of the Buckthorn, and preys upon the caterpillars.
When full fed the larva attaches itself to a twig in the same way as the caterpillar of the White Admiral, but in addition makes a sling from the twig round its body which keeps it in a more or less horizontal position.
The Life-History of a Brimstone Butterfly. Plate 4

(Gonepteryx rhamni)

July 11th

The pupa appears the following day. The discarded skin of the larva may be seen hanging from the twig by a very fine thread.
The Life-History of a Brimstone Butterfly. Plate 5
(Gonepteryx rhamni)

July 26th. 8-10 a.m.

When first the imago emerges from the pupa, its wings are small and limp—
The Life-History of a Brimstone Butterfly. Plate 6
(Gonepteryx rhamni)

July 26th. 8:25 a.m.

—but soon expand—
The Life-History of a Brimstone Butterfly. Plate 7
(Gonepteryx rhamni)

July 26th. 9 a.m.

—and by this time are quite stiff and fit for use.
The Emergence of a Six-spotted Burnet Moth. Plate 1
(Zygaena filipendulae)

July 15th.  7 a.m.

The cocoon attached to grass.
The emergence of a six-spotted burnet moth. Plate 2
(Zygaena filipendulae)

July 15th. 7.5 a.m.

The pupa pushes itself partially through the upper part of the cocoon, using its anal extremity as a lever.
The emergence of a Six-spotted Burnet Moth. Plate 3
(Zygæna filipendulae)
July 15th.  7.6 a.m.
The moth disengages itself—
The Emergence of a Six-spotted Burnet Moth. Plate 4
(Zygæna filipendulae)

July 15th. 7:6½ a.m.

—and having freed its antennae and legs—
The Emergence of a Six-spotted Burnet Moth. Plate 5
(Zygæna filipendulae)

July 15th. 7-6½ a.m.

quickly crawls up the grass, leaving the pupa case sticking out of the cocoon.
The Emergence of a Six-spotted Burnet Moth. Plate 6
(Zygæna filipendulae)

July 15th. 7-21 a.m.

Having found a suitable place where it can hang clear of the grass the wings commence to expand, and when fully grown, but still limp, are folded over the back as shewn.
The Emergence of a Six-spotted Burnet Moth. Plate 7
(Zygæa filipendulae)

July 15th. 7:40 a.m.

The process being now completed the wings take the natural resting position, and the moth soon flies away to join—
The Emergence of a Six-spotted Burnet Moth. Plate 8
(Zygaena filipendulae)

—its friends and relations on some neighbouring thistle head.
The eggs are laid singly in June on the underside of a honeysuckle leaf.
The egg soon hatches, and the young larva is noted for the curious way in which it eats holes in the leaves of its food plant.
While very young the caterpillar is liable to be attacked by an ichneumon fly of the family Braconidae, which punctures the skin and deposits an egg beneath. This egg hatches, and the resulting grub lives upon the substance of its host, avoiding vital parts, until it is full fed, when it forces its way out, and spins its cocoon on the leaf beside the unfortunate caterpillar of the hawk-moth, which soon afterwards dies.
The Life-History of a Broad-bordered Bee Hawk Moth. Plate 4

(Macroglossa fuciformis)

Caterpillar about ¾ grown.
The Life-History of a Broad-bordered Bee Hawk Moth. Plate 5
(MacroGLOSSA FUCIFORMIS)

Caterpillar 3 grown

It will be noticed that the caterpillar has now spots along its sides, and the horn has become curved.
The winter is passed in the pupa state. The chrysalis is of a very ordinary type, and may be found in a very loosely constructed cocoon among dead leaves, on the surface of the ground.
The perfect insect emerges the following May.

*The Life-History of a Broad-bordered Bee Hawk Moth.* Plate 7

(*Macroglossa fuciformis*)
NEWLY hatched caterpillar with the egg shell from which it has emerged.
THE LIFE-HISTORY OF A PRIVET HAWK MOTH. Plate 2
(Sphinx ligustri)

Half-grown caterpillar feeding.
The Life-History of a Privet Hawk Moth. Plate 3
(Sphinx ligustri)

The pupa is subterranean, and may be distinguished from others by its short trunk.
The Life-History of a Privet Hawk Moth. Plate 4
(Sphinx ligustri)

At rest on trunk of oak.
The Life-History of an Emperor Moth. Plate 1
(Saturnia carpini)

Eggs laid among heather.
The Life-History of an Emperor Moth. Plate 2
(Saturnia carpini)

The full-fed caterpillar.
The caterpillar spins a pear-shaped cocoon, in which it turns to a chrysalis.
The Life-History of an Emperor Moth. Plate 4
(Saturnia carpini)

The perfect insect (female).
Sociable Caterpillars

Brood of larvae of Large Tortoiseshell Butterfly (*Vanessa polychloros*).
SOCIABLE CATERPILLARS

Young larvae of Buff-Tip Moth (Phalera Bucephaia).
The curious caterpillar of the—
—Lobster Moth (*Stauropus fagi*).
Caterpillar which has fed on the leaves of an oak tree on which no lichen is growing.

These caterpillars, of all our British species, seem to have the power—
—Scalloped Hazel Moth (*Odontopera bidentata*)

Caterpillar which has fed on the leaves of a lichen covered sallow tree.

—of assimilating themselves to their surroundings most perfectly developed.
PROTECTIVE RESEMBLANCE
CATERPILLARS THAT MIMIC PINE-NEEDLES

Two larvæ of Shaded Broad Bar Moth (*Cidaria variata*).
Protective Resemblance

Caterpillars that mimic Pine-needles

Larva of Pine Beauty Moth (*Panolis piniperda*).
Protective Resemblance

Caterpillars that mimic Twigs

Caterpillars of Pale Oak Beauty Moth (Boarmia consortaria).
Protective Resemblance

Caterpillars that mimic twigs

Larva of Mottled Beauty Moth (*Boarmia repandata*) on honeysuckle.
Protective Resemblance

Caterpillars That Mimic Twigs

Hibernating larva of Great Oak Beauty Moth (*Boarmia roboraria*) on oak.
Protective Resemblance

Larva of Grass Emerald Moth (*Pseudoterpnna pruinata*) on genista.
Protective Resemblance

Larva of Brussels Lace Moth (*Boarmia lichenaria*) on lichen-covered branch of oak tree.
PROTECTIVE RESEMBLANCE

Dingy Skipper Butterfly (*Nisoniades tages*) sleeping on dead teasel head.
Protective Resemblance

Small Engrailed Moth (Boarmia crepuscularia) at rest on trunk of oak tree.
The Grayling Butterfly (Strymon coelestis) resting among fallen pine needles.
Protective Resemblance

The young larva of the Alder Moth (*Acronycta alni*) much resembles a bird-dropping.
Protective resemblance

The Angle-shades Moth (*Brotolomia meticulosa*) among dead oak leaves.
PROTECTIVE RESEMBLANCE

Copper Underwing Moth (*Amphipyra pyramidea*) on tree-trunk.
PROTECTIVE RESEMBLANCE

The caterpillar of the Lilac Beauty Moth (*Pericallia syringaria*), especially the black variety figured, requires a very practised eye to distinguish it from one of the dead and shrivelled leaves of its food plant honeysuckle.
Split bulrush shewing pupa of Bulrush Moth (*Nonagria typhæ*).
The caterpillar of the Goat Moth (*Cossus ligniperda*).

This caterpillar is noted for emitting a most unpleasant odour. It lives in trees, making large burrows through the wood. When full grown it may often be found wandering about footpaths and roads.
In Winter Quarters

Small Tortoiseshell Butterfly (*Vanessa urticae*) hibernating on a beam in loft.
AN IDEAL EDITION.

The Complete Library

will contain the complete works of standard authors in monthly volumes of about 250 pages, foolscap 8vo, uniformly printed on fine paper from new type, and neatly bound.

Price, in Cloth, One Shilling Net., in Leather, Two Shillings Net., each Volume.

This series is an attempt to combine the excellencies of the best library editions with the cheapness of ordinary reprints.

The high standard at which we are aiming in this undertaking will be evident from the following particulars:—

I.—Scope of the Series.

The 'Complete Library' will contain:—(a) The works of those authors who have become standard in our own or in foreign literatures. In the case of such writers all their known works will be included, and these will be perfectly unabridged and complete. Their letters will also be given in collections as complete as possible. (b) Miscellaneous books, such as memoirs, diaries, collections of fugitive poetry, plays, ballads, etc., which are worthy of preservation either because of their intrinsic merit or from their importance in relation to the development of any national literature or to the movements of the times in which they were written.
The collection will therefore consist solely of books of permanent value, which can never go out of date, and it will thus be possible for all, by an almost imperceptible expenditure, to accumulate gradually a library of which every volume will be always worthy of its place on the shelves.

II.—The Text.

The special feature of these editions will be the care which will be taken with the texts. All the different readings, without exception, which are found in the authoritative editions (or manuscripts, as the case may be) will be given, and so arranged that the student will be able to reconstruct with perfect exactness the actual text of any of these editions.

In the case of foreign authors, this great degree of accuracy in regard to the various readings of the text is not considered necessary, but the translations adopted will be of the best, and the particular edition which is followed will be mentioned.

III.—The Editor.

Each author will be edited by a high authority on the subject, who will also write a concise introductory biography.

IV.—In Conclusion.

When necessary notes, glossaries, indices, etc., will be added, and every effort will be made to make these

THE BEST CHEAP EDITIONS PUBLISHED.
